📍 Troy, United States

☎ 586-255-9929

Profile

I have designed, built, and maintained a variety of websites, from small blogs to international, multi-location corporations. I'm able to self-manage projects, as well as coordinate with teams and clients.

Employment History

Freelance Web Developer, Troy

January 2021 — Present

Manage & maintain Wordpress websites for multiple clients in various industries, often with overlapping deadlines.

- Built & edited Shopify & Wordpress themes and plugins.
- Provide technical troubleshooting & repair of websites.
- Managed all client communications, support requests, scheduling, & billing.

Lead Web Developer, GeekTown USA, MI Farmington Hills

May 2019 — January 2021

Lead developer for a digital marketing agency.

- Developed websites for multiple national brands among various industries, including children's athletics, food service, real estate, and medical work.
- Responsibilities included full stack development of (usually WordPress) websites, theme building, and responsive layout design.
- Developed API integrations for clients based on existing SaaS needs. Also acted as the development department head.
- Helped organize processes and implement project management tools
- Managed multiple small teams, including 2 offshore development teams.

Head of Operations, Pink Castle Fabrics, MI Ypsilanti

March 2012 — May 2019

Organized and managed all departments of an ecommerce/retail business in the craft/sewing world.

- Developed website and organized product database containing over 15,000 unique products
- Created production workflow for "Order Fulfillment" team. The team varied from 1-4 members depending on the day, and processes were created to create consistent workflow and quality control regardless of configuration
- Created multiple tools to assist in the management of the store, including unique barcode assignment, shipping software integration, automated creation of product "bundles", and many more
- Managed accounts payable, employee payroll, and tax compliance issues
- Sales and repair of sewing machines

3d Modeler / Animator, Blue Newt Software, Ann Arbor

Hobbies

I wear headphones about 18 hours a day and I'm constantly listening to music. I enjoy houseplants and cycling, I love fantasy stories (books and shows) and try to keep an active game going (pen+paper games like D&D, as well as video games like Diablo 4, Hollow Knight, etc). I also have a teenage son who keeps me on my toes!

October 2008 — March 2012

3D Modeling & texture work for an automotive vehicle simulator.

- Creation of models with multiple Levels-of-Detail
- Painting of textures, including Diffuse, Specular, and Baked Normal Maps
- Creation of props and environments. This included large-scale sections of road and all necessary models/decorations, as well as small "photo shoots" for marketing purposes

Education

Associates Degree, Art Institute of Pittsburgh, Pittsburgh

September 1999 — March 2002

- Studied 3d modeling, texturing, and animation
- Studied lighting, camera work, video graphics and animations
- Took courses on classical art history & specific media techniques
